

ADA Shower Pan Roll-in or Transfer with Collapsible Threshold

This ADA Compliant Roll-in or Transfer shower pan features a collapsible bumper that protects the rest of the bathroom by containing water inside the shower. The 1" bumper collapses which allows for transfer access on smaller pans and wheelchair access on larger pans.

Our shower pans are specifically designed for maximum durability. Made from our exceptional Solid Surface material, this non-porous pan resists mold, mildew and bacteria. Minimal cleaning is required, drastically reducing maintenance costs. Minor stains and scratches can be easily repaired with a Scotch-Brite® pad. Pans are made to order and can be customized to your size, drain location, color and configuration needs. Static thresholds are also available.

ADA Shower Pan Roll-in with Trench Drain

Our brand new design offers the best water containment (and protection of the rest of your building from water damage) of any barrier-free design on the market.

This innovative ADA-compliant shower pan allows for roll-in entry with its flat entrance. A minimal Solid Surface water retainer (1/2" with a 1:2 slope ratio) greatly improves upon the trench drain performance by directing the majority of water to the central drain. Any fugitive water is easily corralled with the trench drain just on the other side. When the outside flooring is properly sloped back, the trench also doubles as a floor drain.

Made from our exceptional Solid Surface material, this non-porous pan resists mold, mildew and bacteria. Minimal cleaning is required, drastically reducing maintenance costs. Minor stains and scratches can be easily repaired with a Scotch-Brite® pad.
